SUMMARY

Computer Science Engineering student with practical experience in mobile and web application development. Worked on real-world projects using Flutter, JavaScript, and Node.js. Currently strengthening data structures, algorithms, and backend development skills to prepare for entry-level software engineering roles.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Jhulelal Institute of Technology | Expected Graduation: 2028

TECHNICAL SKILLS

- Programming Languages: C, C++, JavaScript, Dart, Java (basic)
- Web & App Development: HTML, CSS, Flutter
- Backend & Databases: Node.js, Express.js, Firebase
- Tools & Platforms: Git, GitHub

PROJECTS

Splitmate – Expense Tracking Mobile Application | Flutter, Dart, Firebase

- Developed a mobile application for managing personal and shared expenses.
- Implemented real-time expense tracking, group balance calculations, and monthly summaries.
- Added PDF report generation and group-based expense management features.

VoiceFlow – Text-to-Speech Web Application | HTML, CSS, JavaScript, Node.js

- Built a web application that converts text input into spoken audio output.
- Improved accessibility for users through audio-based content delivery.
- Handled frontend UI and backend logic for text processing.

ADDITIONAL INFORMATION

- Actively practicing Data Structures and Algorithms.
- Interested in backend and core software development roles.
